## TECHNICAL SKILLS

- **Backend:** Java 8/11/17, Spring Boot, Struts MVC, REST APIs, GraphQL, Microservices, Kafka, Distributed Systems, Python.
- **Databases:** SQL:MySQL, PostgreSQL, Oracle SQL, Azure SQL, NOSQL:MongoDB, Firestore, Hibernate, Redis.
- **Testing:** JUnit, Mockito, Karate, Postman, SonarQube, Integration Testing.
- **Frontend:** Html, Javascript, React, Css tailwind.
- **DevOps & Tools:** Git, Docker, Kubernetes, Jenkins, Podman, Maven, Wildfly, ELK Stack, Splunk, GitHub Co-Pilot, AWS.

## WORK EXPERIENCE

### EdgeVerve Systems Limited | Product Integration Analyst

Aug 2025 – Present

- Maintaining legacy Income Tax e-filing application serving millions of taxpayers with 99.5% uptime.
- Developed 10+ new features using Struts framework, enhancing portal functionality and user experience.
- Optimized database queries using Hibernate Criteria API, reducing data retrieval time by 25%.
- Collaborated with cross-functional teams to resolve critical production bugs and ensure seamless system integration.

### Infosys Limited | Specialist Programmer

July 2022 – July 2025

#### Walmart (Retail Client) | Spring Boot, GraphQL, Azure SQL, Karate

- Developed reusable Java library for product search, reducing duplicate code by 30% across 5+ microservices.
- Implemented 50+ integration tests using Karate, increasing test coverage from 50% to 90%.
- Optimized GraphQL queries to allow client-side filtering, significantly reducing network payload and response times.
- Participated in Agile ceremonies and code reviews to maintain high-quality coding standards and system reliability.

#### Sysco (Consumer Client) | Spring Boot, Podman, JUnit, Mockito, Maven, AWS RDS, Secret Manager

- Collaborated in requirement discussions with stakeholders to translate business needs into technical specifications.
- Developed microservices for food supply chain management containerized with Podman.
- Set up integration test framework with 30+ cases covering critical business workflows.
- Reduced environment setup time by 50% by configuring Podman local development containers.

#### CN Canadian National (Logistics Client) | Spring Boot, GCP Firestore, REST APIs

- Designed 15+ API endpoints for Order Management System handling 10,000+ daily users.
- Improved SonarQube coverage from 65% to 90%, eliminating 200+ code smells.
- Streamlined data synchronization processes between REST APIs and GCP Firestore for real-time tracking.

## EDUCATION

**M.Tech - Production Engineering** | Delhi Technological University

**8.5 CGPA** | 2020 – 2022

**B.Tech - Mechanical & Automation** | ADGITM, GGSIPU

**7.24 CGPA** | 2015 – 2019

## CONTRIBUTIONS & ACHIEVEMENTS

- Solved **666+ problems on LeetCode** focusing on Data Structures and Algorithms.
- Published technical articles on design patterns and distributed system architecture.

## CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- AWS Certified Cloud Practitioner
